Dear President Gilman:-

In your letter of August 29th, the enclosure of a list of the scientific instruments expected to be on exhibit at Atlanta was not to be found. I would not trouble you with the matter, were it not that the list might be of great use to me in getting ready for what I am to do.

You will be glad to read the following extract of a letter from Craig:

" I am in splendid shape. I get up at 5, A.M., and after getting my bath and dressing I get in two hours' work before breakfast, which I get at 7.30, and am here in my study soon after 8, where, except lunch hour, I stay till nearly 6, P.M. I have to go to bed, though, at a scandalously early hour, as I am pretty tired by that time. Insomnia has forsaken me. I am working on my course on Theory of Surfaces, and am getting along excellently, so far. I have about one-third of it prepared, and hope to have it all pretty well in shape by the end of the month. "

My old trouble has been making itself quite appreciable

all this summer, but I hope that the extra vacation I have had  
will tell on it in the course of the Autumn.

Yours very sincerely,

*S. Keweenaw*

President D.C.Gilman,

Northeast Harbor, Maine.
