

Open Access from Digital Library Viewpoint

Berlin 7 Conference

Sayeed Choudhury

December 4, 2009

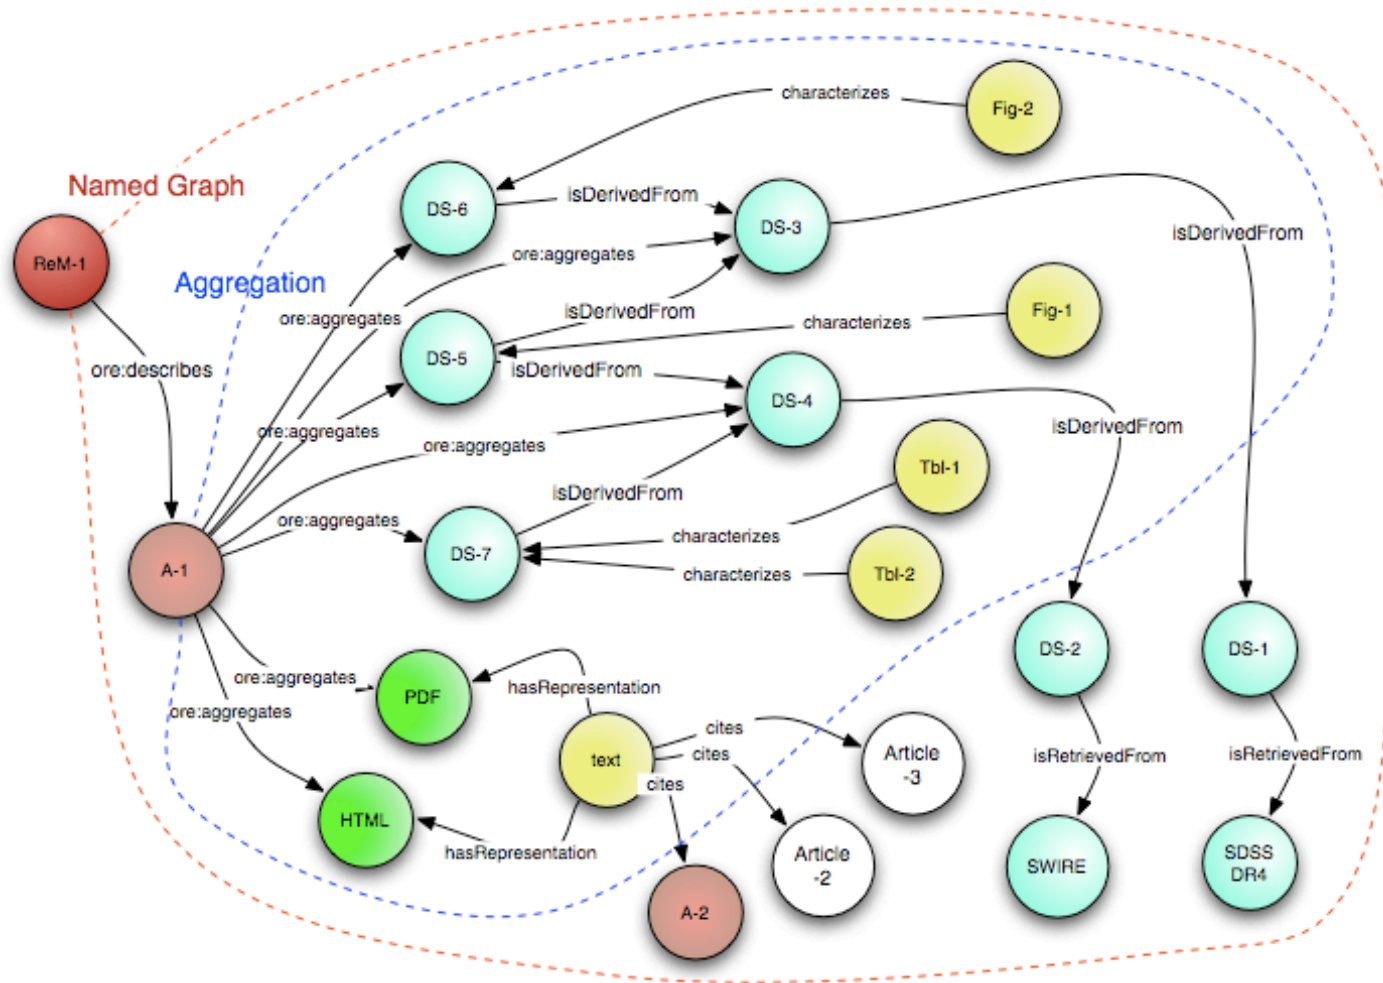

In and Out of Scope

- Johns Hopkins University Projects
- Perspective of Digital Library Community
- Funded by National Science Foundation, but NOT speaking on behalf of NSF
- Two NSF funded projects that are distinct from each other
- Possible connections between open data and open publications

NSF Funded Projects

- The Data Conservancy – One of two initial awards through NSF's DataNet program, which has goal of building data curation infrastructure
- A **feasibility study** exploring policy, technical and business requirements for an open access repository of NSF funded research
- NSF is **not** funding JHU to build an open access repository

Data Model using OAI-ORE

Community Needs

- The digital library community needs to know about appropriate policies and business models that balance stakeholder needs
- Bernard Schutz's insightful idea about the “killer app” that requires open access – what are such applications within your domain or discipline? Across disciplines?
